

# DENVER VIBRATOR

*An American Tradition*

## IMPORTANT SAFETY INSTRUCTIONS

### Rules for safe Pneumatic vibrator operation:

**Failure to follow these instructions may lead to serious injury or even death. This equipment is to be operated by trained and qualified personnel only.**

This equipment is for industrial use only.

**Do Not** operate this equipment before reading this information.

- **Do not** work alone.
- **Know** how to stop the equipment quickly and understand how to operate all of the controls.
- **Always** wear personal protective clothing, safety glasses and other personal protection devices according to the rules of the work area.
- **Ensure** that all air line connections are proper and secure with safety retainer clips in place. Air lines that become disconnected while pressurized and in use can whip uncontrollably and result in bodily harm and even death.
- **Do Not** attempt to disconnect pressurized air lines. Pressurized air lines can whip uncontrollably and result in bodily harm and even death.
- **Excessive** vibration can result in numbness or loss of feeling in the hands. Stop using the vibrator if this occurs and allow normal feeling to return before returning to the work.

### Emergency Preparedness:

**Know** the location of the nearest first aid kit.

**Know** how to contact the nearest ambulance and / or Fire Department.
